SOFTWARE ENGINEERING (CMP-N204-0)
CODE OF CONDUCT

---

1. Purpose and Scope

This Code of Conduct establishes the professional standards, behavioural expectations, contribution requirements, and enforcement procedures for all members of the Closet Swap project team.
Its purpose is to ensure:

- Fair and equitable contribution across all sprints
- Professional and respectful collaboration
- Compliance with university academic regulations
- Successful delivery of all sprint artefacts and coursework components

This Code applies for the full duration of the module. All members agree to comply with its provisions.
Failure to comply may result in formal warnings, documented contribution reports, or escalation to the module delivery team for potential individual grade scaling in line with assessment regulations.

---

2. Professional Behaviour

All team members must:

- Treat all members with respect, professionalism, and courtesy
- Communicate constructively and without discrimination
- Accept differing opinions and resolve disagreements professionally
- Avoid hostile, disruptive, or unethical conduct

Unprofessional behaviour includes harassment, discrimination, aggressive communication, or behaviour that disrupts team progress.

Enforcement:

- First breach: Recorded verbal warning documented in meeting minutes
- Second breach: Formal written warning shared with the team
- Continued misconduct: Escalation to the module delivery team with supporting evidence

---

3. Attendance and Engagement

All members are expected to:

- Attend scheduled meetings, stand-ups, labs, and review sessions where reasonably possible
- Inform the team in advance if unable to attend
- Actively contribute to discussions and planning
- Be prepared with updates and completed tasks

Attendance and participation will be recorded in sprint documentation.

Enforcement:

- One unexplained absence: Recorded warning
- Two unexplained absences: Formal written warning
- Three or more unexplained absences: Escalation to module team with documented evidence

---

4. Contribution and Task Completion

Each team member must:

- Accept and complete agreed tasks within sprint deadlines
- Contribute consistently across all sprints
- Deliver work aligned with agreed project goals
- Take responsibility for the quality and completeness of their work

Contribution will be evidenced through:

- GitHub commits and pull requests
- Issue tracking and Kanban board updates
- Meeting minutes
- Documentation contributions

Enforcement:

- Missed deadline without communication: Recorded warning
- Repeated missed deadlines: Formal written warning + task redistribution
- Persistent non-contribution: Formal contribution report submitted to module delivery team for potential grade scaling

---

5. Version Control and Technical Standards

All team members agree to:

- Use GitHub in accordance with agreed workflows
- Make meaningful commits with descriptive commit messages
- Participate in code reviews
- Not overwrite or delete another member's work without prior agreement
- Only submit code or artefacts they understand and can explain

All development must comply with the tools and techniques specified in the module brief.

Enforcement:

- Minor workflow breach: Correction required + recorded warning
- Unauthorised deletion or modification of work: Formal written warning
- Submission of work not understood or plagiarised: Immediate escalation for academic integrity review

---

6. Communication Standards

The team agrees to:

- Use agreed communication platforms responsibly
- Respond to project-related communication within 24 hours (weekdays)
- Raise blockers or risks early
- Maintain respectful and solution-focused discussion

Silence or avoidance that negatively impacts sprint delivery will be treated as a conduct issue.

Enforcement:

- Failure to respond: Reminder + recorded note
- Repeated communication failure: Formal written warning
- Continued disengagement: Escalation with documented evidence

---

7. Academic Integrity and Ethical Responsibility

All members must:

- Comply fully with university academic integrity policies
- Appropriately declare permitted use of AI tools where required
- Avoid plagiarism or misrepresentation of work
- Ensure submitted work can be explained if questioned

Enforcement:

- Minor documentation omission: Correction required
- Suspected plagiarism or misconduct: Immediate escalation to module delivery team
- Confirmed academic breach: University disciplinary procedures may apply

---

8. Conflict Resolution Framework

If a dispute arises:

1. The issue will first be addressed through respectful discussion
2. The concern and agreed action will be documented
3. If unresolved, the matter will be escalated to the module delivery team

All members will have the opportunity to explain mitigating circumstances.
Failure to engage in resolution processes may itself constitute a breach.

---

9. Contribution Monitoring and Escalation System

To ensure fairness and accountability, the team adopts a structured monitoring framework:

Level 1 – Minor Breach

Examples:

- Single missed deadline
- Minor communication lapse

Action:

- Recorded warning
- Opportunity to rectify within agreed timeframe

Level 2 – Moderate Breach

Examples:

- Repeated missed deadlines
- Minimal GitHub contribution
- Failure to complete agreed tasks

Action:

- Formal written warning
- Redistribution of incomplete tasks
- Contribution percentage recorded in sprint report

Level 3 – Serious Breach

Examples:

- Persistent non-contribution
- Repeated absence without explanation
- Refusal to engage with team responsibilities

Action:

- Formal evidence collection (GitHub logs, meeting minutes, sprint board history)
- Submission of contribution report to module delivery team
- Recommendation for individual grade scaling in line with assessment regulations

The final decision regarding grade adjustment or removal from the group rests solely with the module delivery team.

---

10. Evidence and Documentation Policy

All warnings, breaches, and resolutions will be documented in:

- Meeting minutes
- Sprint review documentation
- GitHub contribution records

This ensures transparency, fairness, and accountability in any escalation process.

---

11. Agreement

By signing below, each member confirms that they:

- Have read and understood this Code of Conduct
- Agree to comply with all responsibilities and enforcement procedures
- Accept that documented breaches may result in formal escalation and potential grade scaling

Failure to comply with this Code may impact individual assessment outcomes in accordance with university regulations.
